## DETAILED ACTION

### *Allowable Subject Matter*

1. Claim 1, 3, 4, 6, and 7 are allowed.

The following is an examiner's statement of reasons for allowance:

2. With respect to Claims 1, 4, 6, and 7, the subject matter of the independent claims not found was the blood treatment device for oxygenating, filtering, and modifying the temperature of blood having a monolithic housing defining a first, second, and third chamber, wherein the first chamber has a plurality of microporous hollow fibers, a heat exchange surface, within the central portion of the first heat exchanger, and a third chamber containing a filtration membrane; the sections are connected such that the filtration inlet receives blood from the blood outlet of the first chamber in combination with the other elements (or steps) in the claims.
3. With respect to Claim 3, The closest prior art of reference is Raible et al. (5,770,149), which discloses a blood oxygenating device, but do not disclose that the filter comprises a blood distribution chamber positioned radially around the oxygenator from the blood inlet, said blood distribution chamber having a varying cross-sectional area having an increased height on one side. Furthermore, it would not have been obvious to one skilled in the art at the time of invention to combine the invention of Raible et al. with the filtering means having a radially disposed blood distribution chamber having a varying cross-sectional area because oxygenating means having blood filtering of this shape and functionality

are not established in the art. The device disclosed by Applicant has the additional utility of providing a heightened fluid flow port 10, thereby ensuring the elimination of air bubbles after fluid leaves the oxygenator.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
